DETAILED ACTION

1. Claims 1-8 are pending.

Election/Restriction

2. Applicant's election without traverse of Group I (Claims 3-8) in a paper dated 09/21/2004 is acknowledged.

Note that claims 1-2 are drawn to tricyclic rings, because Z_2 = a 5-membered ring selected from furan, thiophene, pyrrole, isoxazole, isothiazole or imidazole ring.

Variable Z_2 is not permitted to be benzothiophene or benzofuran ring as stated in the restriction requirement.

3. The claims are drawn to multiple inventions for reasons set forth in the restriction requirement. The claims are examined only to the extent that they read on the elected invention. Cancellation of the non-elected subject matter is recommended in response to this Office Action.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Art Unit: 1624

Claims 3-8 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention:

a. Claim 3 is rejected because it is improperly dependent on claim 1. Claim 3 is drawn to tetracyclic ring (i.e. V_2 and V_3 form a benzo ring, see restriction requirement for Group I). Claim 1 that is withdrawn from prosecution because it is drawn to tricyclic rings (see Group II in the restriction requirement).

b. In claim 3 or elsewhere in the claims, the phrases " V_1 represents a substituent" is indefinite. What substituent? What are covered and what are not? Applicants have to recite the substituents whenever they use "substituent" in the claims.

c. In claims 5-6 and 8, the phrase "dissociable group" is not clear. What are covered and what are not? It is noted that applicants recite at least one dissociable group that are contained in the substituents substituted on the heterocyclic group represented by Z_2 (i.e. a sulfo or a carboxyl group), but applicants don't recite other dissociable groups that applicant intend to claim. What are the other dissociable groups? What does the term actually mean? This is not a standard nomenclature.
